**COMPANY PROFILE**

## About us

With more than 15 years of experience in the field of machine design support, precision mechanical processing, and machine manufacturing, IDEA Group is proud to be a trusted partner of more than 250 companies in Japan, the United States, and other countries in the world. We are committed to quality and delivery time, providing creative, effective, and cost-optimized solutions.

Our business philosophy: "Customer-centric, Employee-centric, Technology-based", we not only focus on customer satisfaction but also value customer development. With a team of more than 250 professional employees, dedicated to the design and production of machinery. This helps us to constantly improve the quality of service and have the ability to respond to many fields for many different markets.

## Our Services & Solutions

**Machine design**  
Machine design and industrial machine design support

**Precision mechanical processing**  
CNC Milling; CNC Turning; Prototype Machining,...

**Automation solutions**  
Automatic packaging and handling; Palletizing; Custom manufacturing

**AGVs solutions**  
Material Transport; Warehouse Automation; Automatic pallet handling

**Technical services**  
AIoT - Smart Manufacturing; Solutions for Businesses

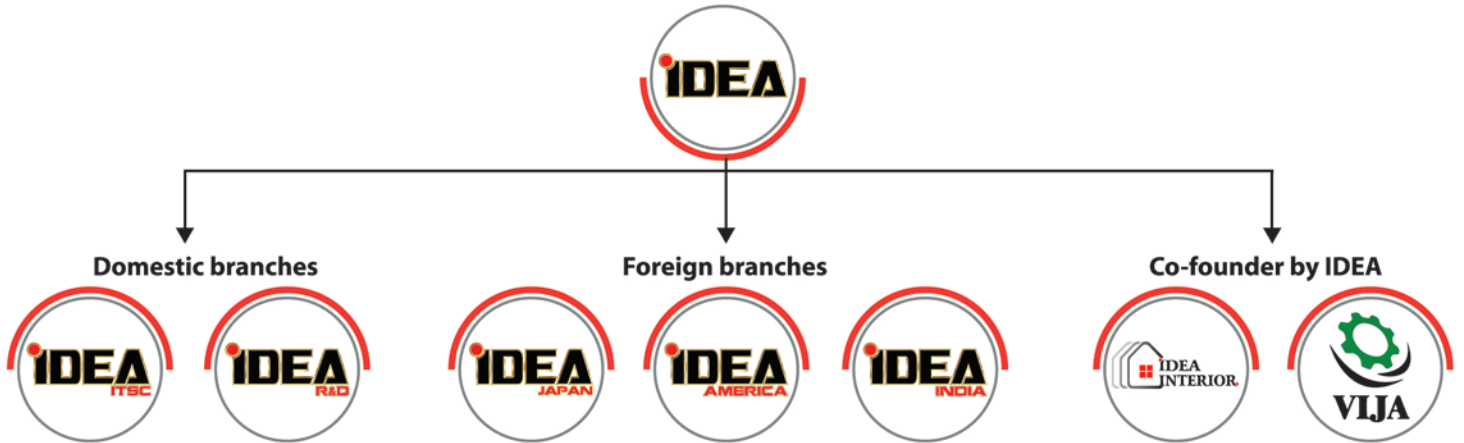

**Training**  
Design Engineer Training; Automation Engineer Training

# Investment Structure

Our company has built a strong and diversified investment structure with a global presence. We operate four subsidiaries, including ITSC branch and IRDC R&D center in Vietnam, IDEA Japan Co., Ltd. in Japan and IDEA America JSC in the United States with a total of over 400 employees.

In addition, we have established strategic joint ventures, IDIN and VIJA, to further enhance our capabilities and expand our reach in the international market. This ecosystem enables us to respond to a variety of customer requirements, and to control costs, quality, and delivery times well.

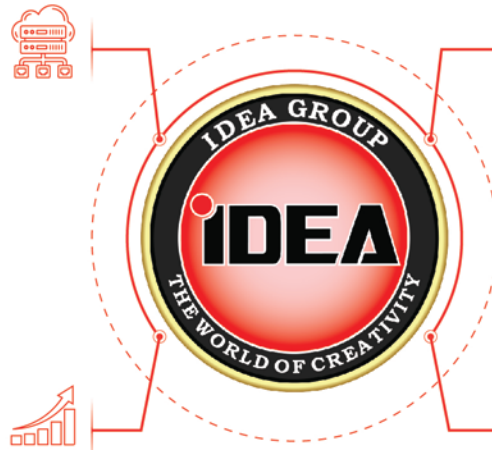

### Vision

IDEA Group aims to become the leading Technology – Service – Engineering Group in Vietnam

### Mission

Contribute to the development of industry, enhance the value of Vietnamese enterprises

### Core values

Compliance – Responsibility – Wisdom – Speed – Gratitude

### Business philosophy

Customer centric, Employees are the mainstay, Technology is the foundation

# Typical Customers

We serve leading companies in automotive, electronics, industrial machinery, and automation, providing high-quality and reliable solutions worldwide.

**Nidec**

**MABUCHI MOTOR**

**RICOH**

**DAIFUKU**

**PANASONIC**

**IHI**

**SHARP**

**BOSCH**

**SIEMENS**

**JABIL**

**KEYENCE**

## MACHINE DESIGN

Currently, we have been providing services to more than 200 corporate customers from countries requiring high quality such as Japan and the United States. After more than 15 years of operating in the field of machine design and manufacturing, IDEA Group has always been highly appreciated by Japanese and American partners and customers for its capacity and professionalism, not only strictly adhering to quality assurance but also focusing on the committed implementation time. We believe that customer satisfaction is the key to our success. Therefore, IDEA Group always strives to take care of customers, listen, understand and solve customer problems as quickly and effectively as possible.

In addition, to ensure the best service for customers, we also highly value the role of our staff. Our team of more than 150 young, enthusiastic design engineers, graduated from leading universities in the field of mechanical engineering in Vietnam, more than 50 engineers were sent to study and support Japanese customers, constantly learning to improve their capacity. They are proficient in at least three design software. We confidently affirm that our team is a solid foundation for every project, ensuring the ability to flexibly meet all customer requirements, helping to solve the problem of shortage of design engineers, reduce costs, and increase production efficiency.

Completed Projects

## Our services

Convert drawings to 2D-3D CAD

Sheet metal fabrication

Design part processing drawings

Strength calculation and analysis

Machine design support contract

Machine simulation

3D modeling creation

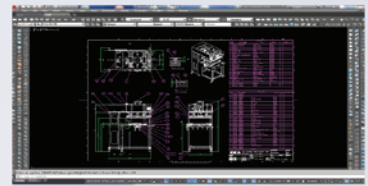

Other design and drafting contracts

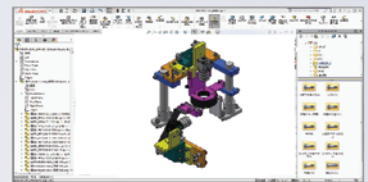

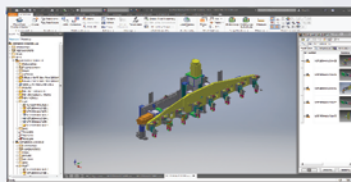

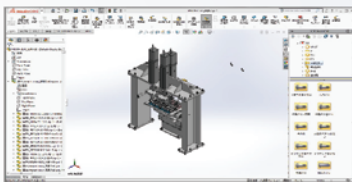

*\* We will make a few samples free of charge so that you can evaluate the unit price and quality of the drawings.*

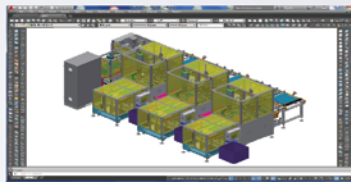

### Parts disassembly

### 3D modeling creation

### Machine design support

## Industries we serve

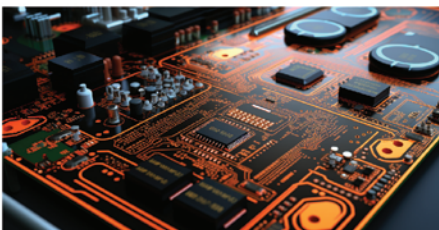

Manufacturing

Automotive

Food and Beverage

Electronics

Consumer goods

Construction

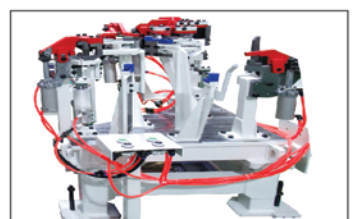

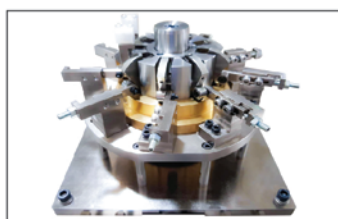

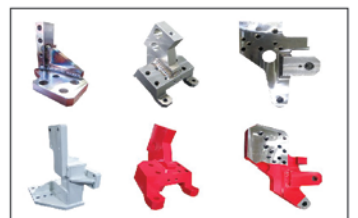

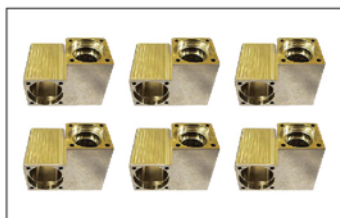

# PRECISION MECHANICAL PROCESSING

We are supplying and exporting to the US, Japan, and foreign invested factories in Vietnam. Product quality and on-time delivery are the two top priorities of IDEA Group. Thanks to that, we have received a lot of positive feedback from customers. Such achievements can be attributed to:

**Strict quality management system:** By applying the ISO 9001:2015 quality management system, we focus on management from materials, processing, quality inspection to packaging and delivery.

**Modern processing machinery:** We own many advanced processing machines and measuring instruments from leading Japanese brands such as Okuma, Mazak and Mori Seiki, capable of handling orders requiring high precision.

**Partner Network:** IDEA Group also has a network of joint ventures and partners that help us flexibly handle orders from single orders to mass production, from small to large sizes, and can process a variety of different materials, including surface treatment.

## AUTOMATION SOLUTIONS

We have the capacity not only to manufacture but also to design concepts from customer requirements. Designed-Manufactured-Transferred technology for hundreds of machines and automation lines for FDI factories, exported to the US, Japan, India, Mexico, serving in fields such as: Automobile manufacturing, Manufacturing of electrical and electronic equipment components, or F&B.. Our typical customers are NIDEC, MABUCHI, JABIL, SIEMENS... Up to now, we have successfully provided more than 500 machines and automation systems including: Sorting machines, packaging machines, assembly machines, automatic testing machines...

With a team of more than 70 engineers with expertise and many years of experience, graduated from leading technical universities in Vietnam, young and eager to learn, experienced in serving G7 customers, can design automation lines with high quality requirements, high complexity, not only supplying machines but also transferring technology. We have a workshop for processing machine parts, with a high rate of internal manufacturing to ensure quality and delivery time. Regarding after-sales policy, we have a maintenance team to provide periodic maintenance and repair services to ensure smooth and stable operation of the machine.

## We can

Industrial equipment/ Automatic machine development and manufacturing

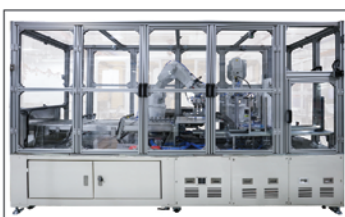

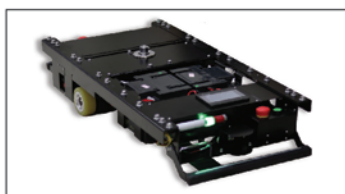

Manufacturing machines based on the drawings received

Receive commissioned production of machinery and equipment

Manufacturing of automated guided vehicles and robots

AUTOMATIC ASSEMBLY MACHINE

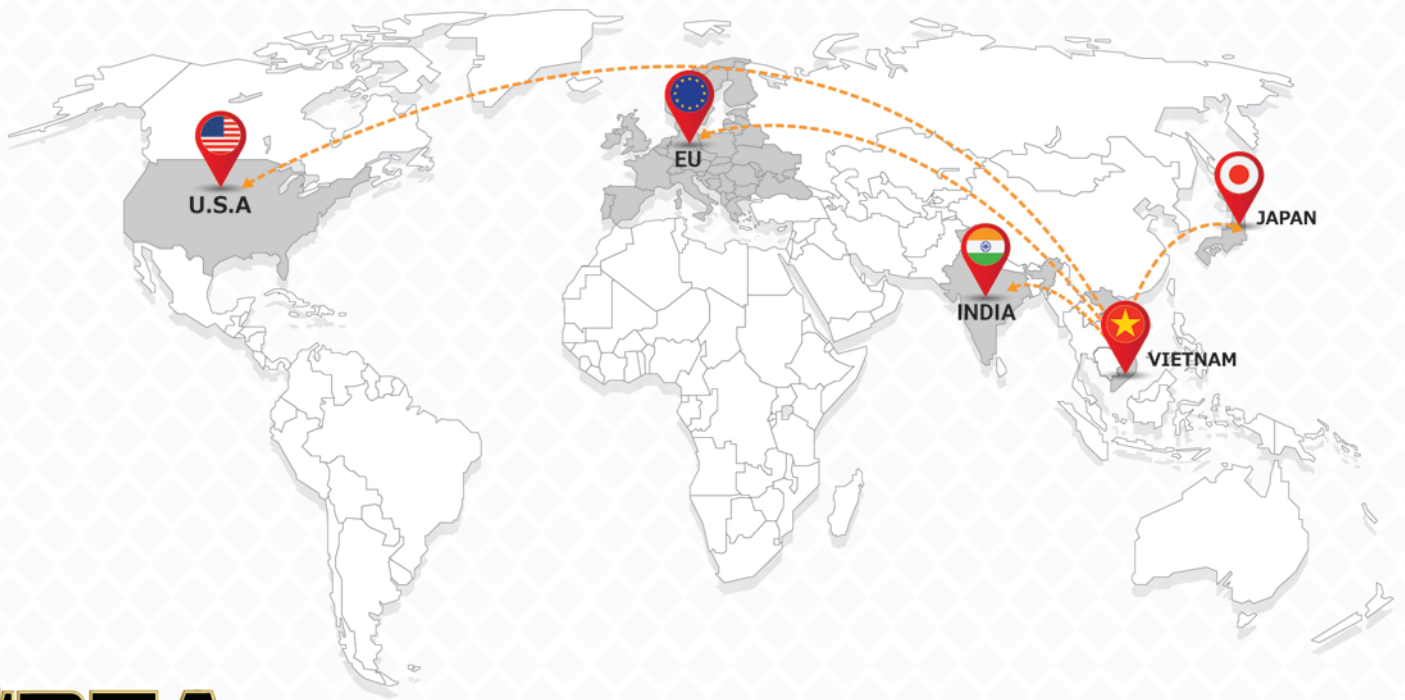

AUTOMATIC LABELING MACHINE

SHRINK FILM & CARTON PACKAGING MACHINE

AUTOMATIC INSPECTION MACHINE
